

## IX.4.5C-SYSTEM-CGDEF PROGRAM FCINIT COMMAND CGDEF

Command CGDEF is used to define Carryover Groups and modifies the following files in the order listed:

<u>File Name</u>	<u>Action Taken</u>
FCFGSTAT	Add Carryover Group name to Forecast Group definition
FCCARRY	Date carryover for each Segment in the Forecast Groups
FCSEGSTS	Add Carryover Group name to each Segment in the Forecast Groups
FCCOGDEF	Add Carryover Group definition and update carryover group index record

### Message Output

The message output before the initial file update is:

```
*** BEGINNING FILE UPDATE FOR DEFINITION OF CARRYOVER GROUP xxxxxxxx.
```

The messages indicating successful file updating and successful Carryover Group definition are:

```
*** FILES SUCCESSFULLY UPDATED FOR CARRYOVER GROUP xxxxxxxx.  
*** CARRYOVER GROUP xxxxxxxx SUCCESSFULLY DEFINED ***
```

### Error Recovery

There is currently no method for error recovery other than restoring files from the most recent backup copy.
